Information architecture, wireframing e prototyping. Generative and exploratory research. Usability tests. Insights from Page Diagnostics and SharePoint Manager Plus.

EXPERIENCE

2022 CURRENT — SharePoint-Based Solutions Contruction *at Little Green Light*

I´m responsible for the design, development and implementation of custom solutions leveraging SharePoint components including interface modification, script creation and data integration.

My day to day involves: • improving the user experience by customizing sharepoint interfaces using **Html, CSS and JavaScript**, • developed custom scripts to automate processes, • validate data inputs, and enhance user interactivity, resulting in increased efficiency and productivity. • use SharePoint designer to create and customize workflows, forms, and master pages, aligning SharePoint solutions with business processes and branding requirements.

2021 1 YEAR — SharePoint Solutions Leveraging Azure IaaS, PaaS, and SaaS *at Casafari*

In my role as a SharePoint solutions architect at Delloite, I have demonstrated a strong understanding of developing and deploying SharePoint solutions that harness the capabilities of Microsoft Azure's Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS) offerings.My responsibilities have **focused on leveraging Azure services to optimize SharePoint** deployments,enhance scalability, and improve overall performance.

My day to day involves: • deploying environments on Azure virtual machines to provision scalable infrastructure resources including high availability configuration and disaster recovery strategy.• Web part Development, • single sign-on authentication,• **automated workflows**, • Utilized Azure Blob Storage and Azure SQL Database to store and manage SharePoint content, improving scalability and performance.

2019 2 YEAR — Advanced SharePoint Interface Customization *at Wirecard*

My role has been focused on leveraging the latest tools and methodologies to tailor SharePoint interfaces to meet the unique needs and branding requirements of our clients.

My day-to-day involved: • Developing SPFx applications using modern web development technologies such as TypeScript, React.js, and Angular, • enabling rapid development and deployment of SharePoint customizations. • SharePoint integration with Microsoft Power Platform components such as Power Apps and Power Automate to create powerful and automated business solutions. • Developing custom JavaScript solutions to enhance navigation, automate tasks, and improve user interactions within SharePoint sites.

2018 1 YEAR — Development of Custom Form Applications *at Dental Direct*

Led the development of custom form applications using PowerApps, Developed canvas apps and model-driven apps tailored to specific business requirements, integrating seamlessly with SharePoint Online. Developed complex form logic and automation using Power Automate (formerly Flow) to streamline approval processes and automate business workflows.

2017 1 YEAR — SharePoint Developer *at Doa Comm*

Implementing custom solutions to optimize data management, content organization, and document collaboration.Created custom Power Apps forms and workflows to automate processes and enhance user interactions within SharePoint environments.
